CS121 BL/BSC (HW131)

This is the BUDGET version on the 32bit HW131 basis. RAM/ROM is identical to the HW121 basis, but the processor is faster. (This device is out of production – replaced by CS121 BL/BSC HW131 4MB). For this type the last firmware level is FW 3.8x – not for FW 4.x

CS121 BL (HW131), external aluminum chassis, front side

CS121 BL (HW131), external aluminum chassis rear side

CS121 BL (HW131), external aluminum chassis – type label with serial number starting: „0121B… until 0121B05149"

CS121 BSC (HW131), PCB slot view front side

CS121 BSC (HW131), PCB slot view rear side, type label with serial number starting: "0123B… until 0123B06299 and from 07001 until 08400"
